-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The response and declaration received 1/28/04 and 2/17/04 have been made of record.

Claims 1-22 and 26-32 are pending. Claims 22 and 26-31 are withdrawn from consideration.

The rejection under 35 USC 102(a) contained in the previous office action is withdrawn in view of applicants' arguments and declaration.

Claims 1-21 and 32 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Applicants' claims are directed to an adhesive composition. Applicants have included claim language which makes it unclear as to whether applicants are claiming an adhesive composition or a laminate structure article.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-9, 11-14, 17-21 and 32 are rejected under 35 U.S.C. 102(e) as being anticipated by Shimada et al.

For the purposes of this rejection the rejected claims are seen as directed to an adhesive composition. All structural limitations pertaining to circuit electrodes and

adhesive layers are seen as intended use and are not seen as imparting patentability to the claims.

Shimada et al disclose adhesive compositions suitable for mounting semiconductor devices comprising resin and insulating inorganic filler in relative amounts such as claimed instantly (claims 1 and 5). These adhesives are further taught as possessing moduli of elasticity and thermal expansion coefficients such as claimed instantly (Table 3, ex. 12 and 13).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edward J. Cain whose telephone number is (571) 272-1118. The examiner can normally be reached on M-F from 10:00 to 6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vasu Jagannathan, can be reached on 571 272-1119. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
